## The competition

## 竞赛

## *Il concorso*

The project shown in these pages has been awarded with the second price at International design Competition "2016 Chongqing South Bank Residential-skyscraper Green Eco Space". The design intent is to improve the living environment and lifestyle in the high-rise building, to form a new design sample for the future building development and design icon. The jury, composed by Pierre Alain Croset (President), Stefano Boeri, Zhang

在这些页面中展示的项目是设计大赛“重庆南滨特区超高层住宅绿色生态空间设计国际竞赛”。在超高层架空层空间设计中，引入生态环境体系，改善开改变居住者的生活环境及生活方式，将三者有机串联一起，作为未来城市发展的标志范本和参考案例，荣获二等奖额作品。本次大赛的陪审团由主席 Pierre-Alain Croset 组成，Stefano Boeri, Zhang Zhi Qqiang, Bo Xi e Shen Chi, 评审团根据第一阶段和来自全球45岁以上候选设计

*Il progetto mostrato in queste pagine è risultato vincitore del secondo premio nel Concorso di progettazione internazionale "2016 Chongqing South Bank Residential-skyscraper Green Eco Space". Obiettivo del concorso è stato di migliorare le condizioni ambientali e lo stile di vita degli spazi interni collettivi degli edifici alti, per definire un modello progettuale innovativo in grado di diventare un'icona per lo sviluppo edilizio e per la progettazione futura.*

Zhi Qqiang, Bo Xi e Shen Chi, selected for the second phase 8 designers groups chosen by a first phase of entries and an international preselection of under 45 designers.

The project shows a viewpoint on some architectural themes for the Chinese contemporary growing city. The key issues investigate a design approach to the contemporary architecture which is influenced by the scarcity of resources and by the necessity of an architecture more conform to our environmental fragility.

师的预选，在第二阶段选择了8个组。我们想通过一面映射出西方当代建筑的视角，即一项资源缺乏和建筑需求与脆弱环境彼此共生的项目，为当代中国城市建筑的某些主题提供一个位置。

*La giuria, presieduta da Pierre Alain Croset e composta da Stefano Boeri, Zhang Zhi Qqiang, Bo Xi e Shen Chi, ha selezionato per la seconda fase 8 gruppi scelti in base a proposte di prima fase e preselezionati in base a candidature da tutto il mondo di progettisti con meno di 45 anni. Abbiamo voluto proporre una posizione su alcuni temi dell'architettura per la città della Cina contemporanea attraverso un approccio al progetto che rispecchia un punto di vista occidentale ai temi dell'architettura contemporanea, condizionata dalla scarsità di risorse e dall'esigenza di un'architettura più conforme alla fragilità dell'ambiente.*
