

SWISSPEARL®

**swiss
pearl®**

Qualità superiore
per un'architettura
di prestigio

Storia : Sistemi per facciate SWISSPEARL®

- Produttore europeo leader nei sistemi per facciate in fibrocemento per soluzioni architettoniche di prestigio.
- A partire dal 1982, primo produttore in assoluto a lanciare sul mercato una linea di prodotti dopo l'altra utilizzando la tecnologia senza amianto; conversione totale della produzione nel 1990
- Leader mondiale per tecnologia di colorazione, “know-how” facciate e competenza in fatto di sistemi
- Interessanti possibilità progettuali con una vasta gamma di prodotti, colori e aspetti diversi
- > 14 milioni di metri quadri di prodotti per facciate in fibrocemento senza amianto installati dal 1990
- > 1000 edifici/facciate realizzate ogni anno
- L'alta qualità svizzera è famosa in Europa

SWISSPEARL®

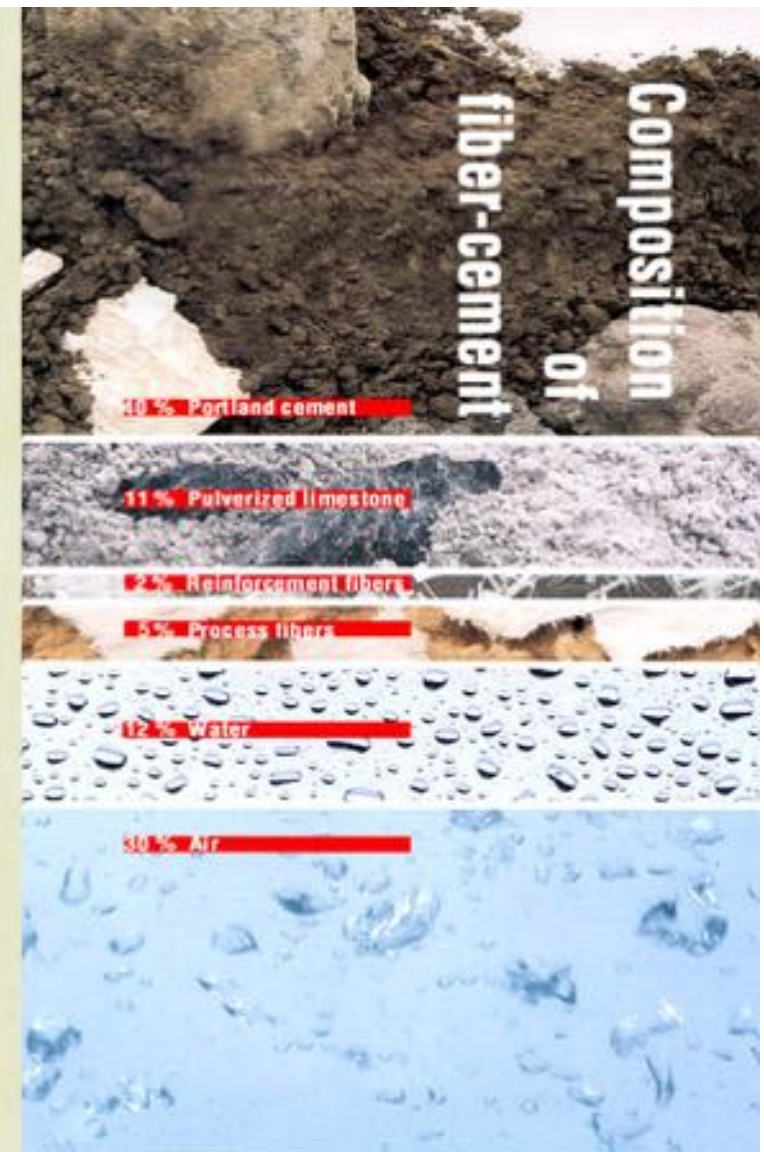

SWISSPEARL®: Progetti nel Sud Europa

- **Molti edifici sono stati realizzati in questi ultimi 3-4 anni nel mondo, soprattutto:**
 - Vari edifici destinazione uffici, sede di importanti aziende
 - Molte scuole secondarie, collegi, università, ecc.
 - Altri edifici pubblici come gli ospedali, case di riposo, aeroporti, ecc.
 - edifici residenziali (nuove costruzioni e ristrutturazione)
 - centri commerciali, edifici commerciali
 - Ecc.
- **Più di 1000 progetti in tutto il mondo (oltre 2 milioni di m2) in opere realizzate;**
- **Principalmente edifici pubblici di alto profilo**

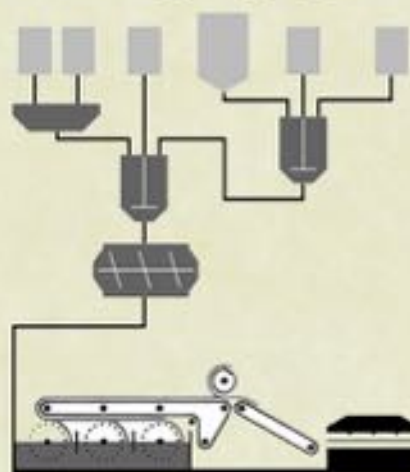

Che cosa è il cemento composito?

- Un peso leggero, materiale colorato integralmente con un unico carattere in pietra
- composto principalmente da cemento, con fibre non tossiche, pigmenti, acqua e aria
- contiene solo sostanze inoffensive
- ecologico, riciclabile al 100%
- resistente al fuoco
- Grandi differenze di qualità a seconda del produttore.

Perchè SWISSPEARL® è un buon prodotto ecologico?

- Principalmente è composto da materie prime minerali naturali (cemento-cellulosa-inerti-acqua-aria)
- Assenze di sostanze pericolose
- Il processo di produzione è a basso consumo energetico
- Produzione mediante riciclo dell'acqua
- Energia grigia = 125 MJ / m² di facciata

- Il sistemi Swisspearl® fornisce la chiave alle soluzioni per la conservazione dell'energia
- Durata più di 40 anni
- dall'installazione iniziale così come dall'ultimo smantellamento
- Il processo per riciclare completamente i prodotti di facciata negli impianti, ha avuto esito positivo.

SWISSPEARL®

Processo di fabbricazione basato su ciclo d'acqua chiuso

SWISSPEARL®

Ciclo di vita - Sostenibilità

Le facciate ventilate Swisspearl, hanno dimostrato di essere molto efficaci in termini di costi nel lungo termine, date le prestazioni del sistema della longevità (incluso la durata di vita più lunga della stessa struttura dell'edificio), una separazione strutturale dei materiali, l'efficienza energetica e basso costo di manutenzione.

SWISSPEARL® pannello prodotto:

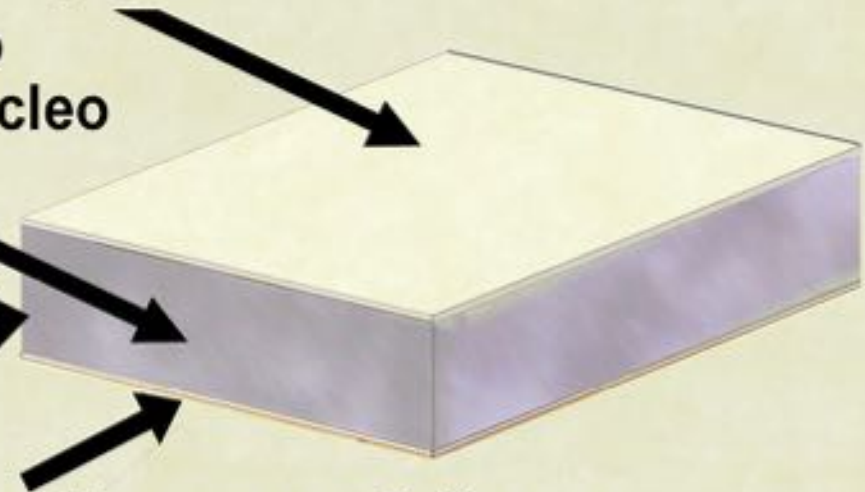

Livello superiore incolore, pigmentato o colorato

Colorazione del cemento
composito attraverso nucleo
di alta qualità con fibre
di rinforzo

Bordi sigillati

Lo strato posteriore garantisce un perfetto
equilibrio della lastra

Questo sistema brevettato garantisce le prestazioni
ottimali del pannello ed una qualità duratura

- Architetture personalizzate a 360° -

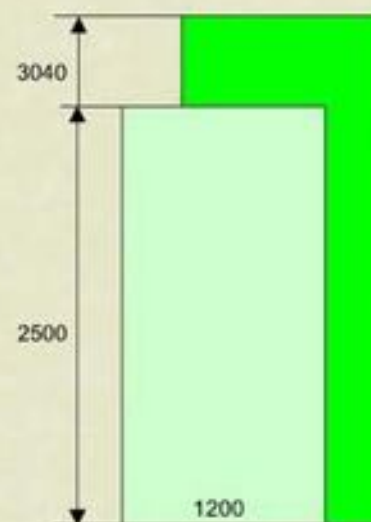

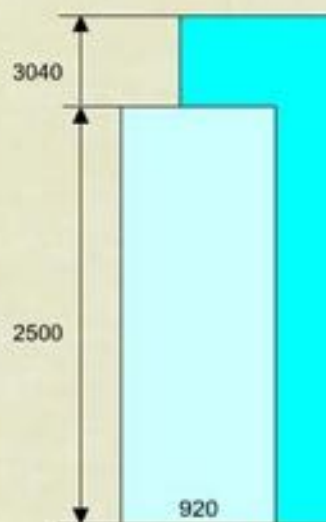

- Consulenza in fase di progettazione
- Preventivi e capitolati
- Progettazione
- Fornitura e posa in opera

SWISSPEARL®

SWISS pearl®

Formati:
tagli personalizzati entro le misure sotto indicate.

Spessore mm. 8-12

SWISSPEARL®

SWISSPEARL®

**SWISS
pearl®**

**Colorazioni nella massa:
5 finiture, 2000 colori e tonalità personalizzate.**

SWISSPEARL®

Caratteristiche dei pannelli per facciate SWISSPEARL®

- Qualità eccezionale e affidabilità del nucleo in fibrocemento e del rivestimento
- Processo di colorazione rivoluzionario introdotto da Eternit Svizzera.
- Elevata resistenza a condizioni meteorologiche estreme e al gelo (garantita da -40°C a +80°C)
- Durata prevista minima: 40 anni
- Lastra base totalmente sigillata su 6 lati
- 5 interessanti versioni superficiali, texture uniche
- Senza efflorescenze

Che cosa può succedere se le lastre in fibrocemento non hanno la qualità SWISSPEARL®?

Efflorescenze

Differenza di colore

SWISSPEARL®

Che cosa può succedere se le lastre in fibrocemento non hanno la qualità SWISSPEARL® ?

Macchie nella superficie del pannello

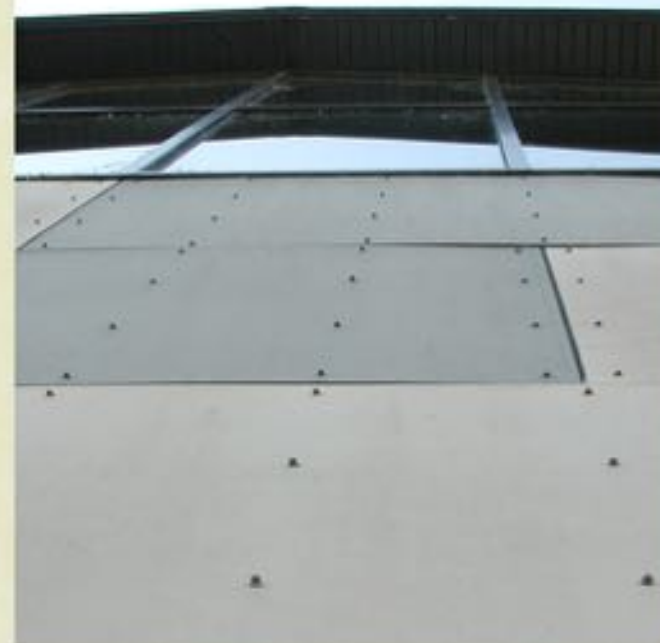

SWISSPEARL®

Che cosa può succedere se le lastre in fibrocemento non hanno la qualità **SWISSPEARL®**

Il colore sbiadisce visibilmente entro 2-3 anni

Deformazione

SWISSPEARL®

Che cosa può succedere se le lastre in fibrocemento non hanno la qualità SWISSPEARL®?

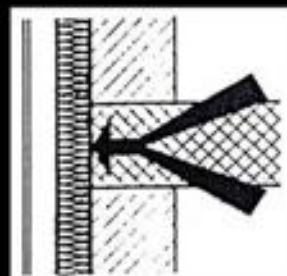

Crepe

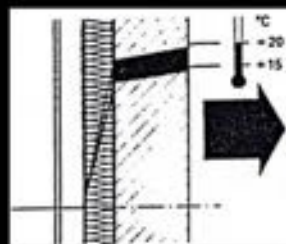

SWISSPEARL®

Facciate ventilate SWISSPEARL®

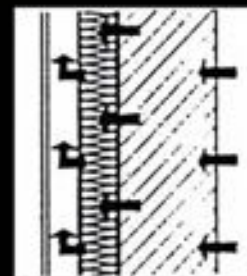

Principio

Senza ponti termici

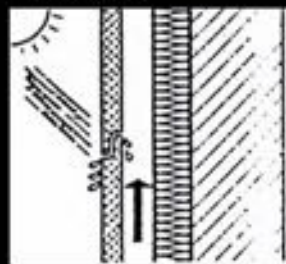

Il calore dell'ambiente viene trattenuto nella struttura della parete

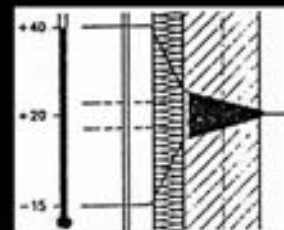

La condensa viene eliminata

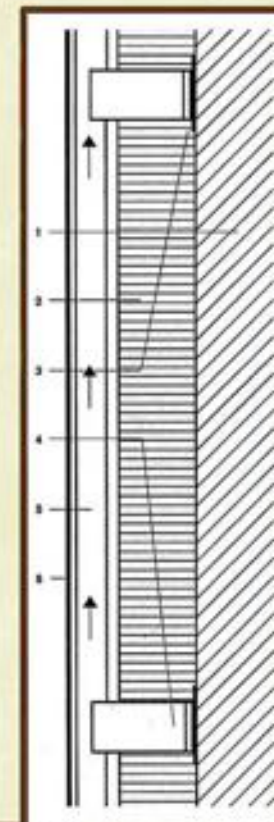

In estate parte del calore viene espulso dall'aria circolante

Senza umidità sull'isolante

Strato d'aria + isolante riducono le differenze di temperatura

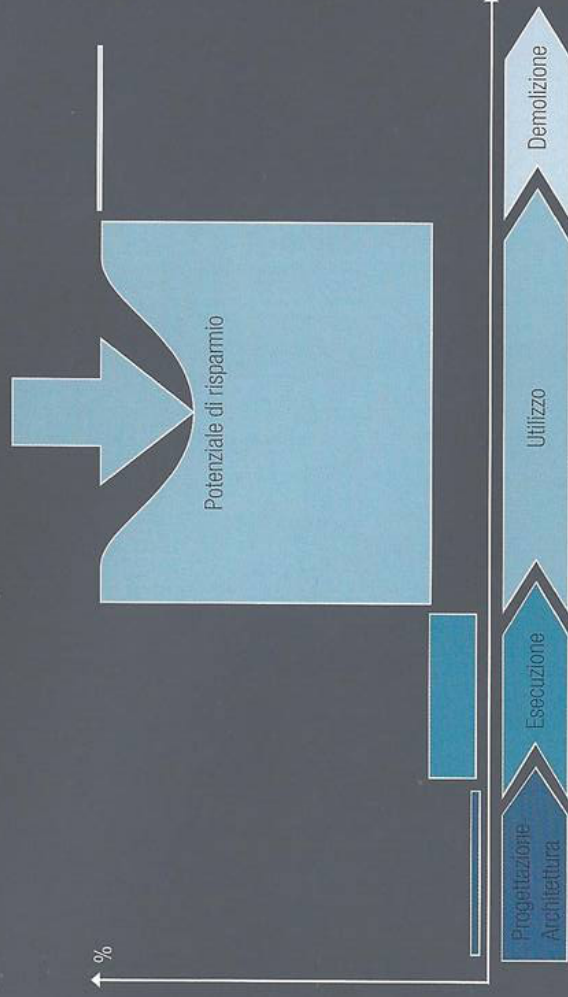

- 1 Struttura di supporto
- 2 Isolamento termico
- 3 Interruttore
- 4 Sottotelaio: il sottotelaio in metallo leggero funge da supporto per i montanti verticali che sostengono il carico
- 5 Montanti verticali (spazio ventilazione posteriore)
- 6 Rivestimento: lastre per fasciate SWISSPEARL

SWISSPEARL®

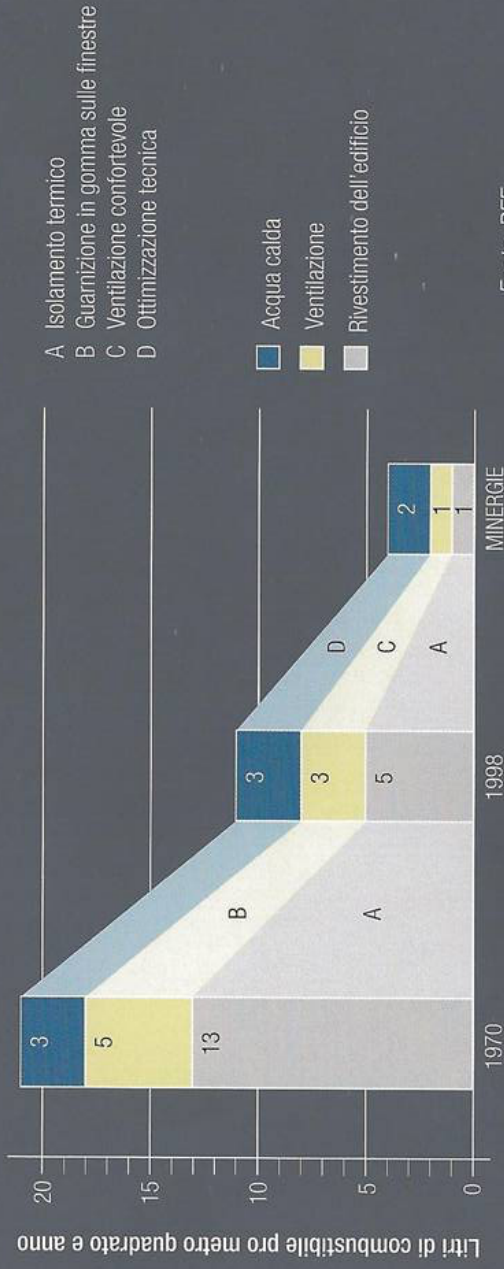

OBIETTIVO: IL POTENZIALE RISPARMIO

Il potenziale più grande per il risparmio nelle costruzioni risiede nei costi di esercizio e manutenzione per tutta la durata dell'utilizzo. Questi costi possono variare notevolmente a seconda della modalità costruttiva dell'esecuzione. I sistemi soggetti a danni possono portare rapidamente a sorprese incalcolabili. Vale quindi la pena, sin dalla progettazione, puntare su spese vantaggiose per i cicli di vita. In particolare nel rivestimento dell'edificio sussiste qui un grande potenziale di risparmio. I sistemi di alta qualità Eternit assicurano notevoli risparmi di spese per tutta la durata d'uso grazie alla loro efficienza funzionale a lungo termine e all'assenza di manutenzione. Un investimento che rende per l'efficienza in termini di costi nel tempo.

COSTI DEL CICLO DI VITA DI IMMOBILI

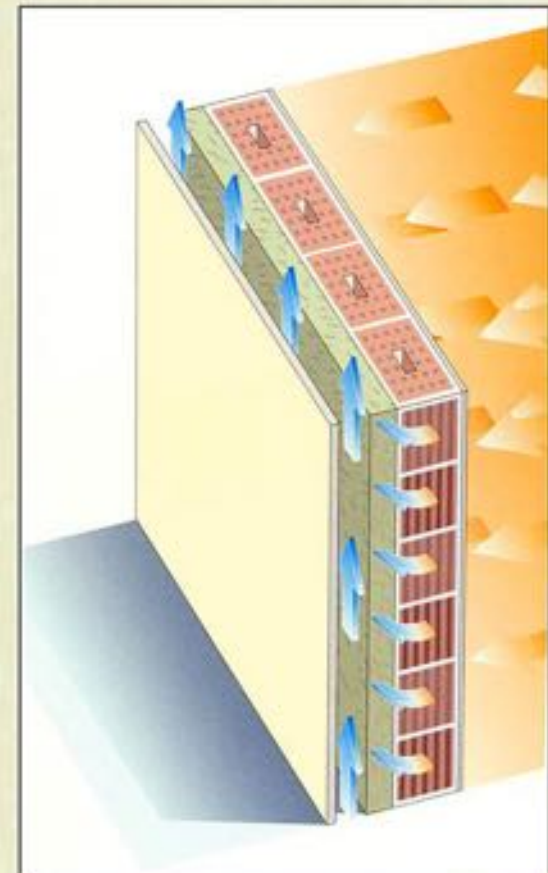

RISPARMIO ENERGETICO NELL'EDIFICIO

Facciate ventilate SWISSPEARL®

Vantaggi

- Il sistema più affidabile dal punto di vista della fisica delle costruzioni
- Sistema appositamente realizzato per applicazioni con rivestimento protettivo anti-pioggia
- Il sistema a ventilazione posteriore elimina l'umidità, non si forma la condensa
- La circolazione dell'aria ottimizza l'efficacia dell'isolante
- Lunga durata dei materiali da costruzione

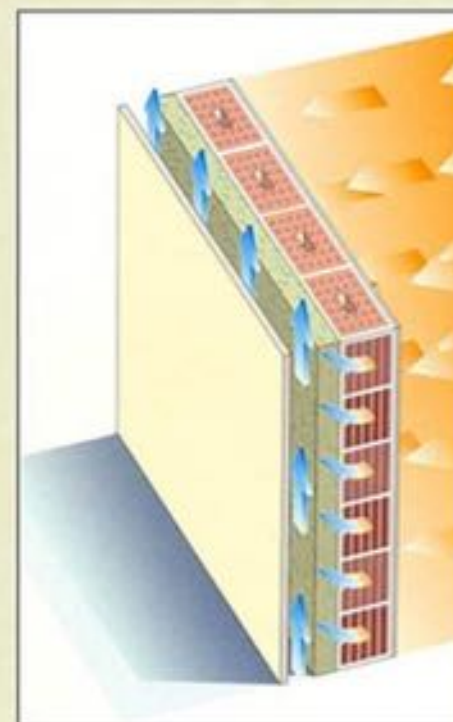

SWISS pearl®

Facciate ventilate SWISSPEARL®

Vantaggi

- Migliore qualità della vita grazie al clima interno confortevole sia in inverno che in estate
- Manutenzione quasi assente, senza giunti sigillati

SWISSPEARL®

Vantaggi dei sistemi per facciate SWISSPEARL®

- “Know-how” facciate avanzatissimo e competenza in fatto di sistemi per pannelli in cemento rinforzato con fibre
- Sistemi per facciate ventilate SWISSPEARL®: qualità superiore collaudata da lungo tempo
- Sistemi di fissaggio progettati appositamente, collaudati in ogni dettaglio, per sottotelai in alluminio, acciaio e legno
- Progetto qualità globale dal fornitore di materie prime e componenti di sistema fino all’installatore

SWISSPEARL®

Vantaggi dei sistemi per facciate SWISSPEARL®

- Adatti agli edifici nuovi e per ristrutturazioni di ogni tipo e dimensione
- Ampia libertà creativa per la progettazione della facciata dell'edificio
- Numerose soluzioni di dettaglio realizzate con cura
- 10 anni di garanzia

SWISSPEARL®

Creatività Linea 3D con finiture

Possibilità creative illimitate

- Disegni geometrici,
- casualità dei moduli
- Logo della società, ecc

**Grandi nuove opzioni
per dare un unico, tocco
speciale ad ogni edificio
di alto profilo.**

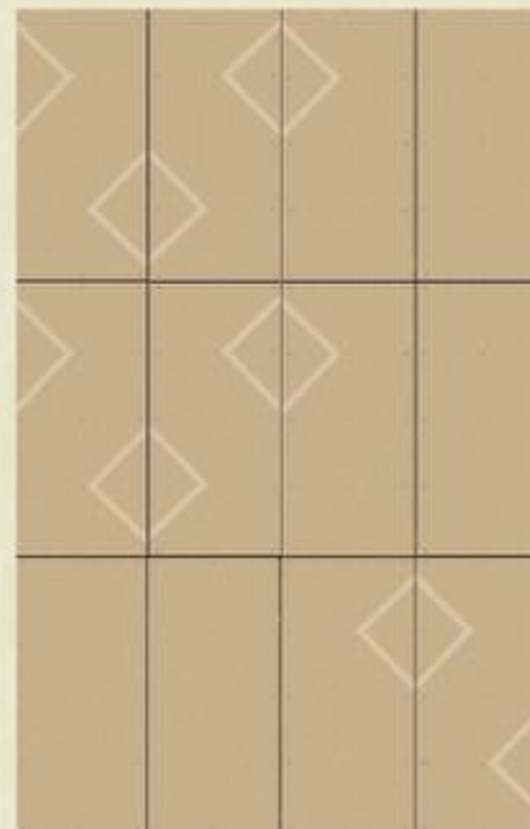

Creatività

Linea 3D con finiture

Le decorazioni possono essere eseguite su un singolo pannello o su più pannelli per creare un modello più grande.

Enormi possibilità di colore a seconda del colore della finitura superficiale e dell'anima: stesso tono, lievi o grande differenza nei toni, elegante contrasti, ecc.

Creatività

Linea 3D con finiture

Alta qualità di produzione

- decorazioni con possibili smussature a 45 °
- superficie finale completamente tinta con trattamento trasparente o colorato.

Alcune possibili limitazioni nella progettazione (statica).

Disponibili per la consegna Primavera 2009.

Interior Design

Le lastre SWISSPEARL® sono adatte anche ad applicazioni interne di prestigio quali hall, sale conferenze, aeroporti, ecc.

Spesso l'installazione è simile alle facciate ventilate.

Pannelli forati

SWISSPEARL®

Vantaggi dei pannelli forati

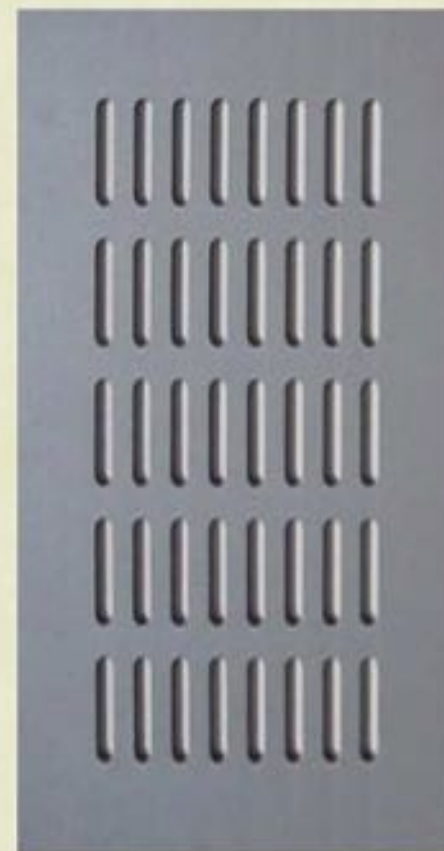

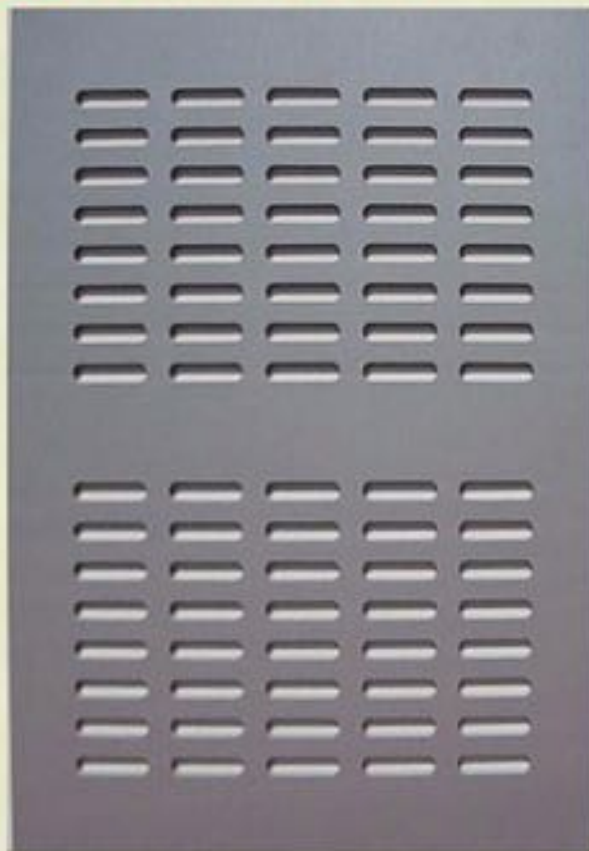

- **Un esclusivo, e molto versatile modo di progettare: Fori e fessure permettono di creare effetti insoliti.**
- **Pannelli perforati possono avere una funzione (ante scorrevoli, parabrezza, separazione, assorbimento dei suoni, ecc.)
... o essere puramente decorativo**
- **Può essere realizzato con qualsiasi pannello Carat / Reflex / XPressiv**
- **Spessore obbligatorio a secondo della: statica, funzione, numero, dimensioni e della ripartizione delle perforazioni.**

Ampia gamma di possibilità di progettazione

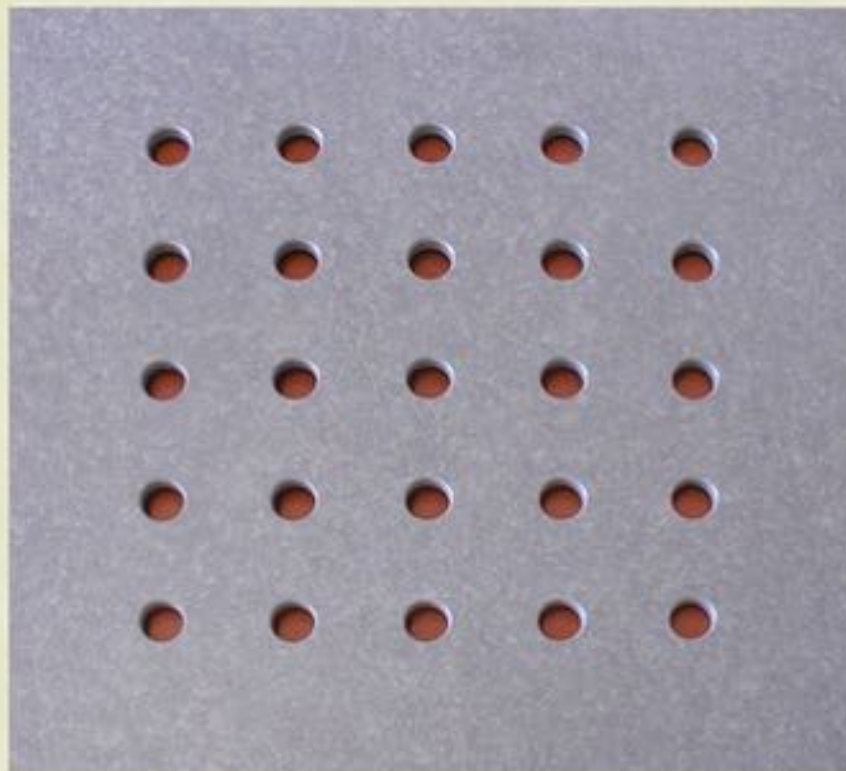

SWISSPEARL®

Ampia gamma di possibilità di progettazione

Ampia gamma di possibilità di progettazione

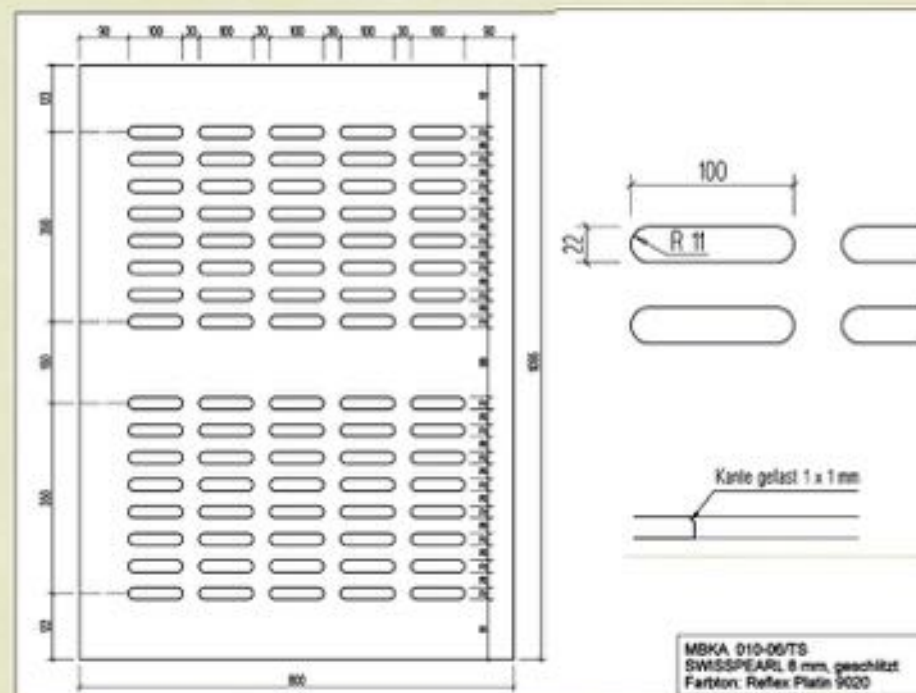

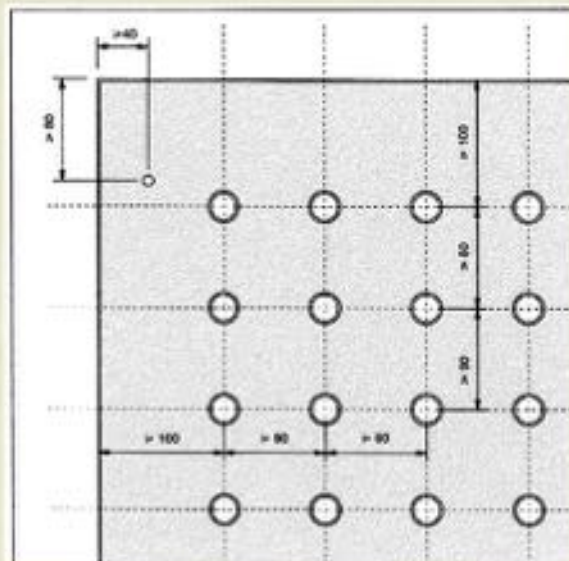

SWISSPEARL®

Limiti di progettazione

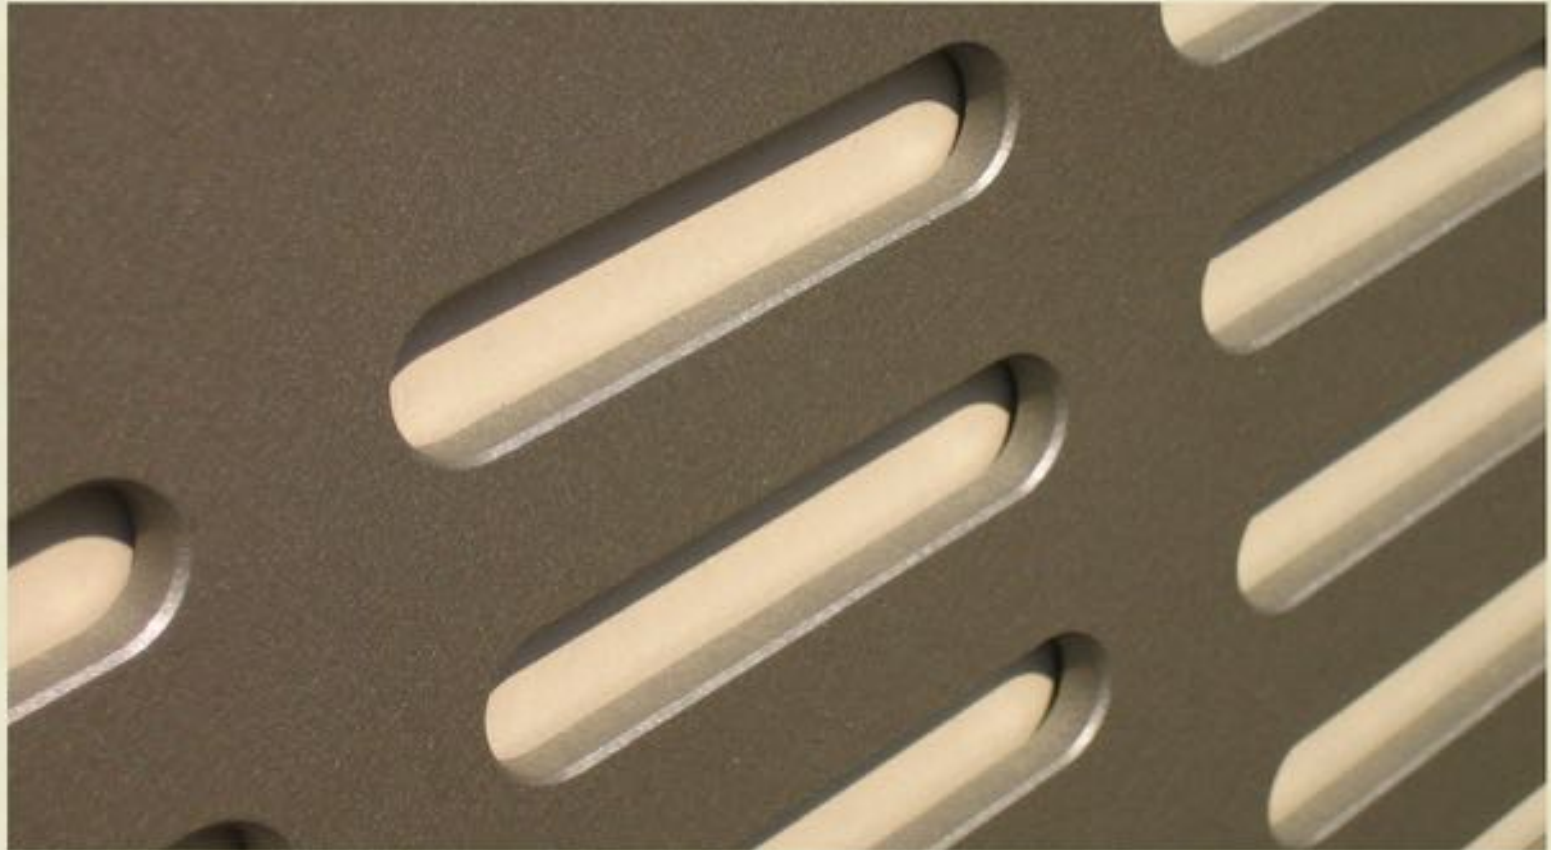

I soli limiti di progettazione sono nella statica di ogni formato o modello destinato alla foratura che dovrà essere controllato, a seconda del tipo, della dimensione, della ripartizione e della posizione dei fori richiesti. **Come linee guida:**

- **Superficie di foratura:**
 - * **Massimo pari al 20% se spessore uguale a 8 mm**
 - * **Massimo pari al 25% se spessore uguale a 12 mm**
- **Lo spazio pieno dovrà corrispondere a 2 volte il diametro del foro**
- **Mantenere uno spazio di circa 8 centimetri dal bordo senza forare.**

La quinta facciata

SWISSPEARL®

Vantaggi principali

In Architettura

- design elegante e caratteristico, ideale per l'architettura moderna
- Inclinazione sotto ai 6 gradi.
- La possibilità di avere tetto + facciata dello stesso aspetto
- costruzione a peso leggero
- Ampia gamma di colori

Qualità

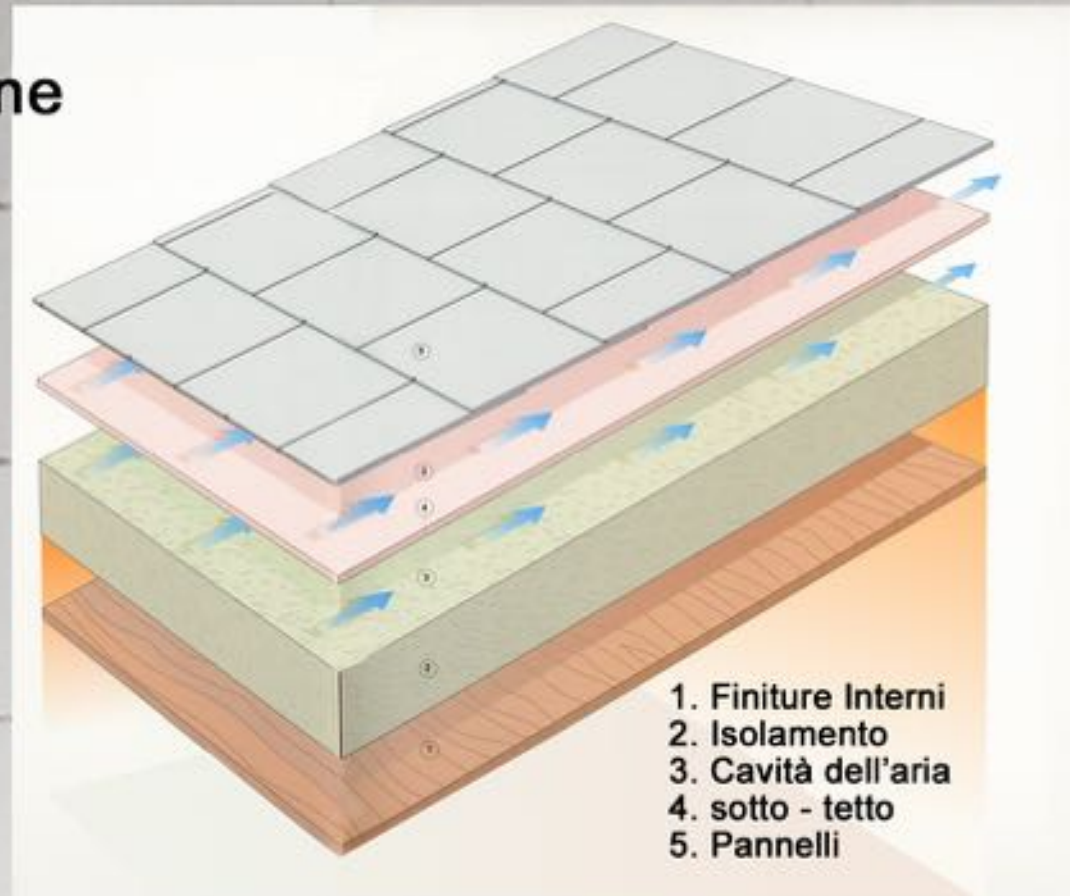

- Stesso tempo di provata qualità come per facciata
- Quasi privo di manutenzione
- il tetto ventilato evita la maggior parte di problemi causati dalla condensa

100% ecologico e riciclabile

Applicazione nei tetti

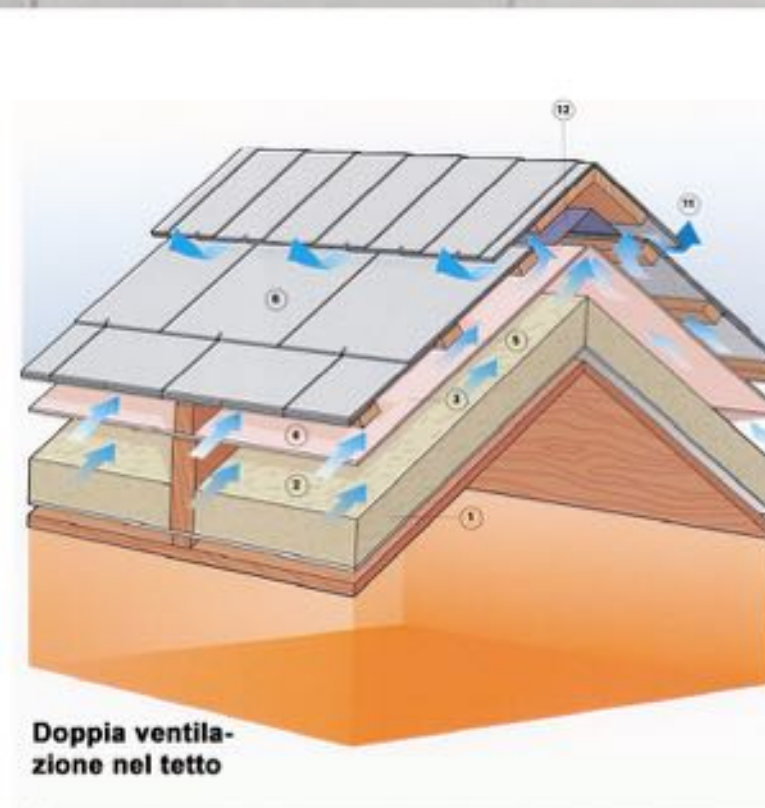

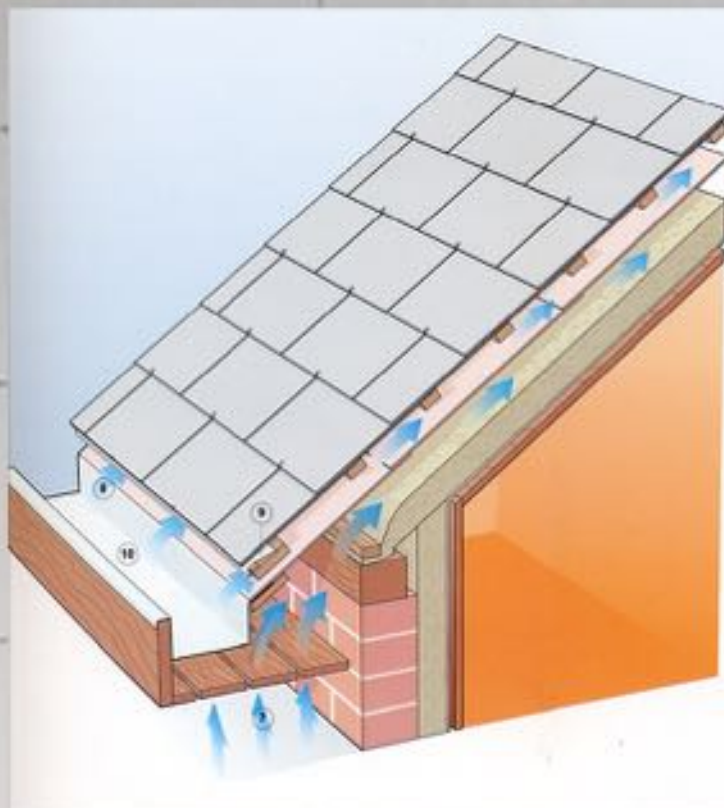

Sistema: Principio di tetto ventilato

Netta separazione
delle funzioni

Applicazione nei tetti

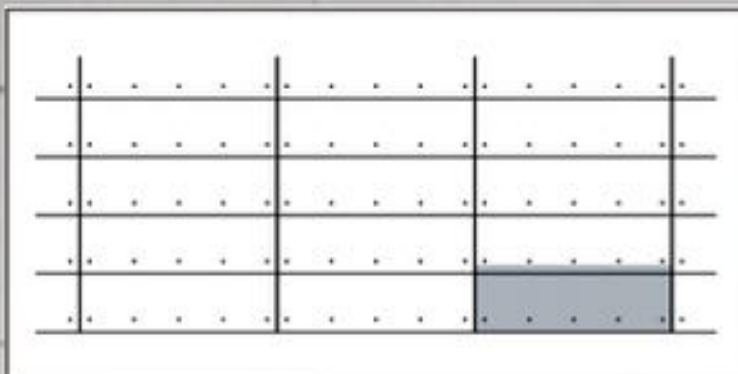

Il principio del tetto ventilato: Circolazione di aria

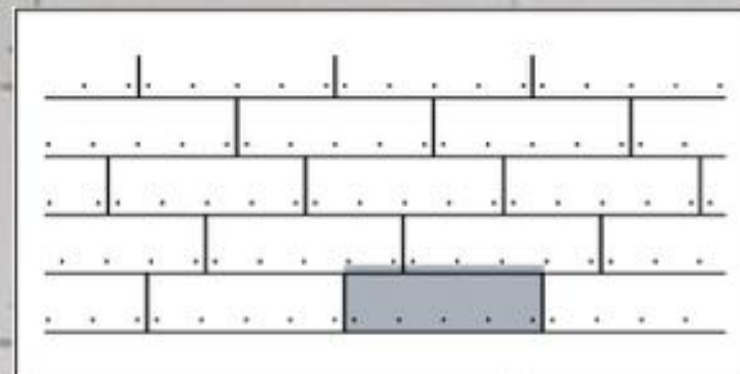

Applicazione nei tetti

Possibilità di progettare con pannelli sovrapposti

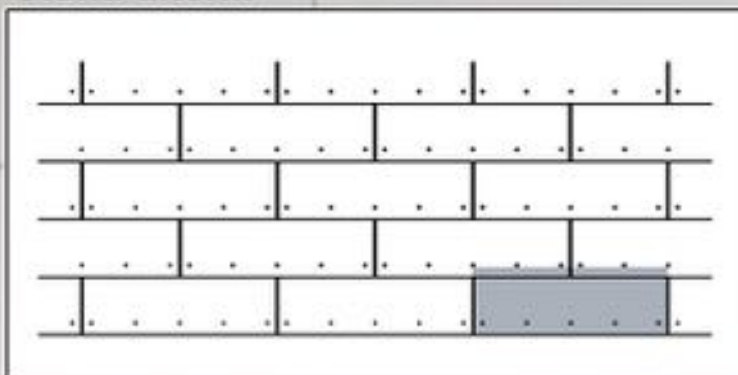

Giunti lineari

Giunti sfalsati

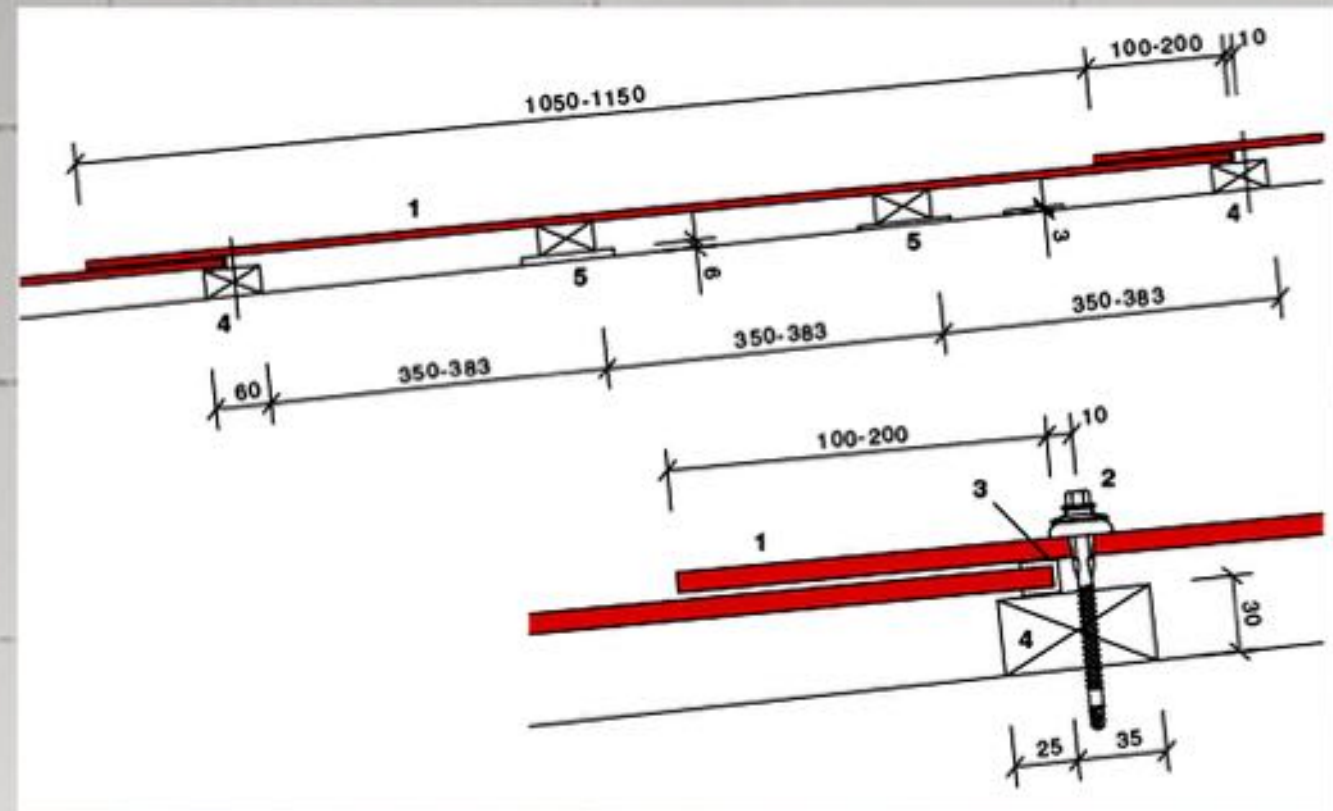

Giunti alterni

Applicazione nei tetti

Costruzione

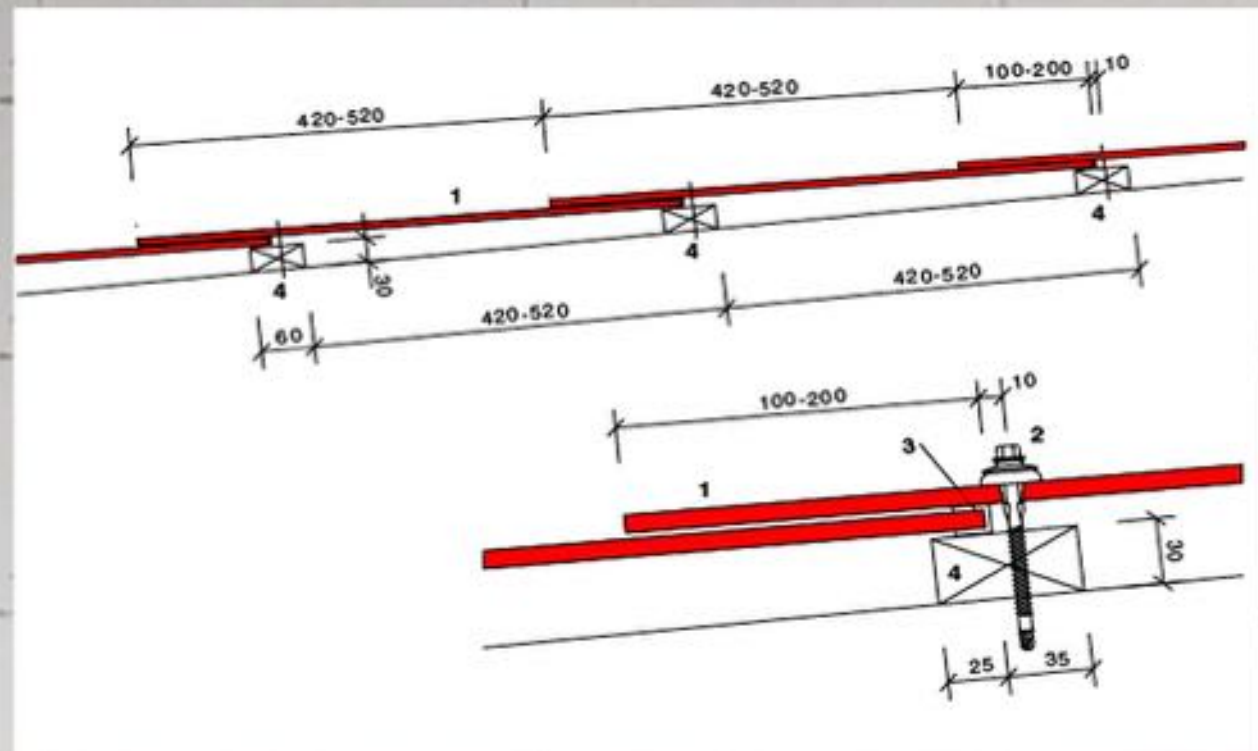

Pannello di 2500 x 1220 millimetri

Applicazione nei tetti

Costruzione

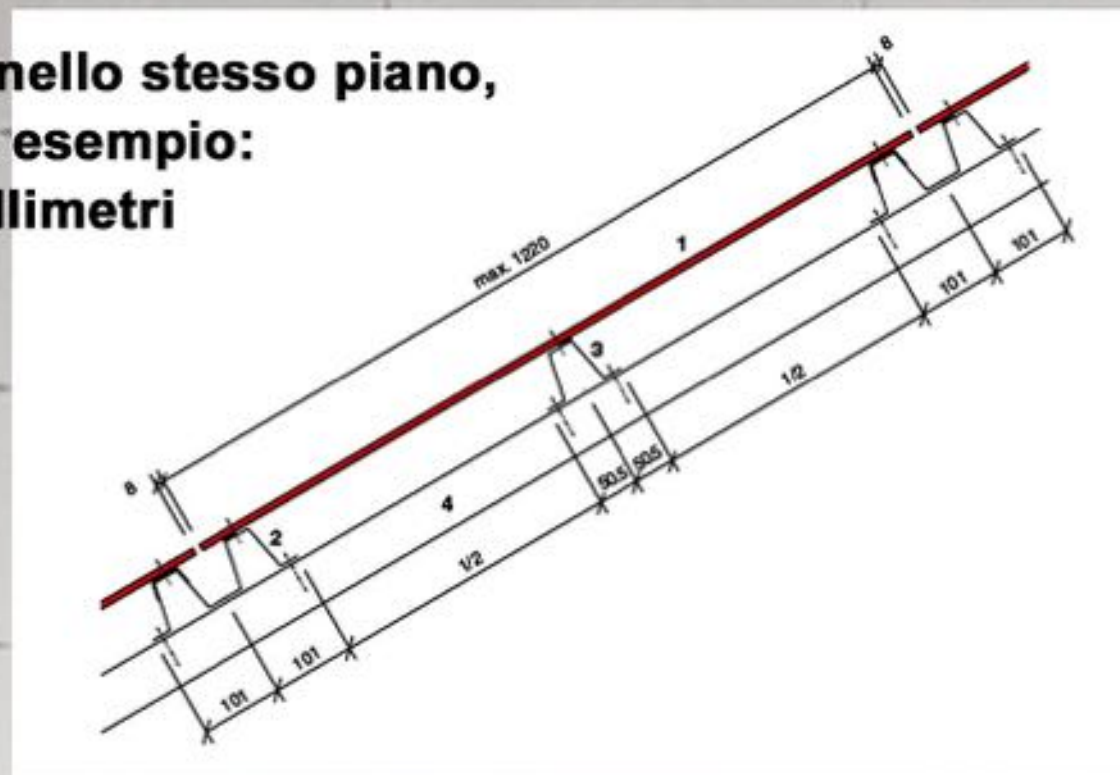

Pannello di 2500 x 600

Applicazione nei tetti

Costruzione

**Tutti i pannelli nello stesso piano,
dimensioni per esempio:
2500 x 1200 millimetri**

Applicazione nei tetti

Gamma di prodotti

1. Pannelli installati con sovrapposizione

**2. Tutti i pannelli nello stesso piano
(Crea)**

Pannello di lunghezza = 2500 mm

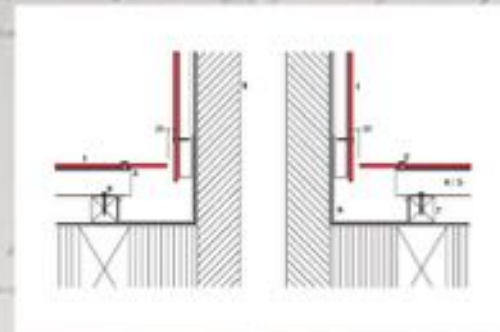

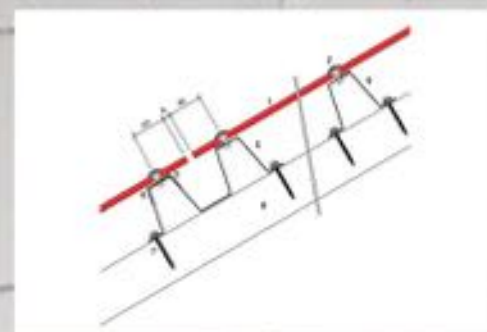

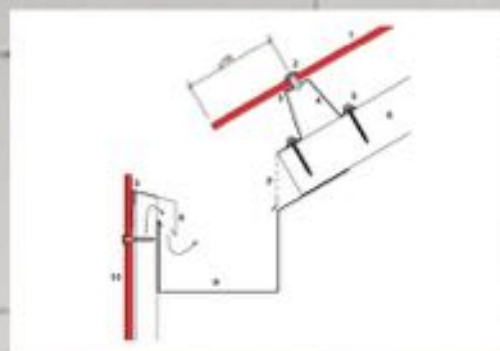

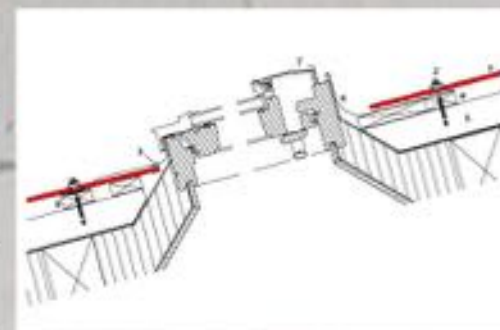

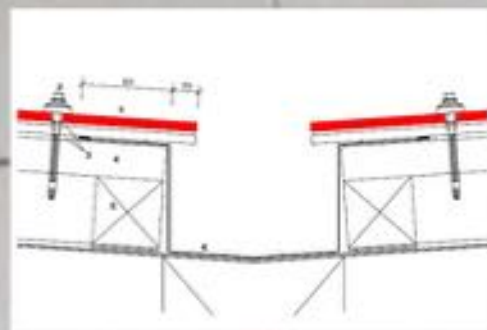

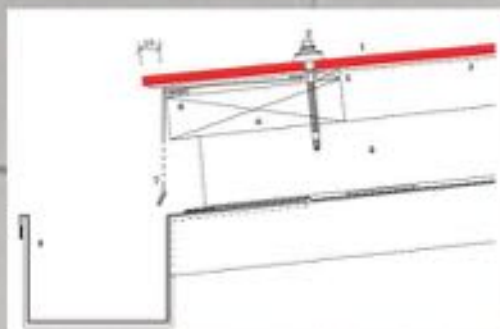

- Larghezza di 600 mm

- Larghezza di 900 mm

- Larghezza di 1200 mm

Applicazione nei tetti

Dettagli

Per tutti i particolari sono disponibili i dettagli in formato DWG, DXF, PDF. Esempio: spigoli, cornici, grondaie, ciminiere, ecc.

Applicazione nei tetti

La Gamma cromatica

**Simile al rivestimento
per tetti quali ardesia:
Molto pigmentata nello
strato superiore**

Pannelli di facciata
- Planea
- Nobilis
- Carat
**non tutti i colori
sono disponibili.**

**Speciali colorazioni per
applicazione su coper-
ture modificano l'aspet-
to nella loro superficie.**

Applicazione nei tetti
