

## SECONDO INCONTRO DEL CICLO

### “QUALI PROSPETTIVE PER IL BIOTECNOLOGO MEDICO IN AZIENDA?”

Orientamento per gli studenti del CLM in Biotecnologie Mediche.  
Interviene Luana Tomaipitınca, ricercatrice presso Cellcolabs AB.

#### LUANA TOMAIPITINCA

*Luana Tomaipitınca is a researcher in cellular and translational science with a background in cellular and molecular biology and a PhD in Morphogenesis and Tissue Engineering from Sapienza University of Rome.*

*After completing her PhD, she expanded her expertise through postdoctoral research in immunology and tumour microenvironment at Sapienza University.*

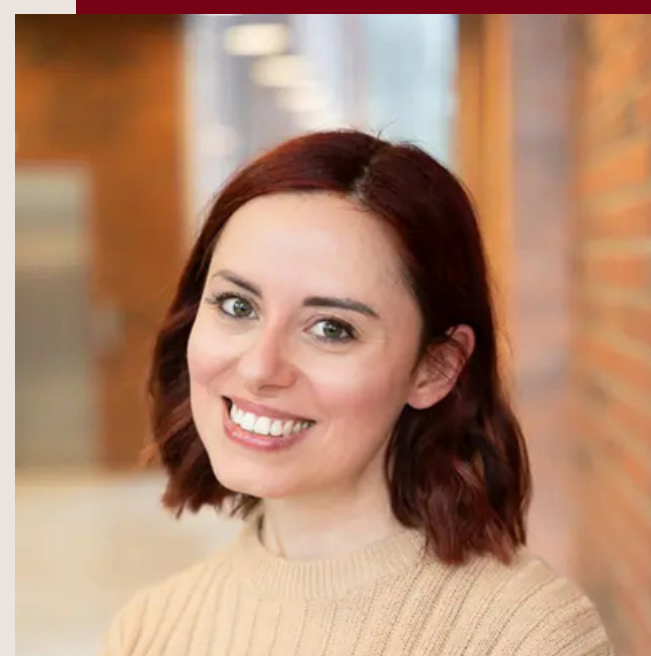

*She then continued her postdoctoral training in hematology at Karolinska Institutet, focusing on the development of a novel protocol for neutrophil preparation for clinical transfusion.*

*Currently, she is a Researcher at Cellcolabs AB, a biotechnology company focusing on making high-quality stem cells available at industrial scale.*

*At Cellcolabs, she works on the development of potency assays to support mesenchymal stromal cell-based therapies.*

*Her career reflects a journey from academic research to biotech, driven by curiosity, adaptability, and a strong interest in translational science.*

*She was recently recognized with the Nordic Early Stage Professional Award from the International Society for Cell & Gene Therapy for her contributions to the field of cell therapy.*

**LUNEDÌ 12 GENNAIO  
ORE 15.00**
