AIR OPS EXERCISE

Group Work

You have to prepare a presentation whose title is “*Accountability in Aircraft Dispatch process*” containing (at least):

description of the accountability in the evaluation/decision process to state that the aircraft is in condition for safe operation and fit to make the intended flight

The presentation has to include the answers to the questions below :

- What does it exactly mean “*aircraft in condition for safe operation and fit to make the intended flight*”?
- In case of multiple failures who is responsible to ensure that an acceptable level of safety is maintained?
- As a CAMO, how would you communicate to OPS the aircraft next due maintenance?

The presentation has to be completed in 15' maximum
