

# FATTY ACIDS

Hydrocarbon chain,  
4-28 C atoms  
ending with a carboxylic group  
even numbers in nature  
(saturated or unsaturated)

*Fatty acids are classified based on their chain length,  
Parameter  
driving their blood/tissues destination/distribution:*

- Short chain: < 6 C atoms
- Medium chain: 6 -12 C atoms
- Long chain 13 – 21 C atoms
- Very long > 22
